Abstract

© Canadian Center of Science and Education. The purpose of the study is to validate man's capability of metaphysical acts to confirm "humanity in man". It discloses the sense of metaphysics: to transcend man to the area of universal generic generality "purifying" him from narrow frames of applied functions and roles. Metaphysical events serve as a way of compensation of ontological deficiency and social truncation of man. The study shows that metaphysics is a value inalienable from man.
